MEDICAL DIAGNOSTIC FORM – PHYSICAL IMPAIRMENT

To be completed electronically, in English, by a registered medical doctor.

Athlete information			
First name:	Mohamad Harith Syafi	Last name:	Bin Syarizam
Date of birth:	31/12/2000	Gender:	Male
Member association:		WA ID:	

Permanent health condition and resulting impairment

--

Eligible Impairment type(s)

- | | | |
|---|---|--|
| <input type="checkbox"/> Limb deficiency | <input type="checkbox"/> Impaired muscle power | <input type="checkbox"/> Motor ataxia |
| <input type="checkbox"/> Hypertonia | <input type="checkbox"/> Impaired passive range of motion | |

Health condition

Permanent <input type="checkbox"/>	Stable <input type="checkbox"/>	Progressive <input type="checkbox"/>	Fluctuating <input type="checkbox"/>
Year of onset:		Congenital (birth): <input type="checkbox"/>	
Chronology of health condition			

Additional details on medical diagnosis (if needed):	
All medications and reason for prescription:	

Presence of additional medical condition/diagnosis

<input type="checkbox"/> Intellectual Impairment	<input type="checkbox"/> Impaired respiratory function	<input type="checkbox"/> Joint hypermobility/instability
<input type="checkbox"/> Hearing Impairment	<input type="checkbox"/> Impaired metabolic functions	<input type="checkbox"/> Impaired muscle endurance (e.g. Chronic fatigue)
<input type="checkbox"/> Psychological diagnoses	<input type="checkbox"/> Impaired cardiovascular functions	<input type="checkbox"/> Other:
<input type="checkbox"/> Vision Impairment	<input type="checkbox"/> Pain	
Describe:		

Diagnostic evidence to be attached

Documentation marked with (*) is mandatory and must be submitted together with this form. All other documentation may be submitted upon request.

Eligible impairment	Documents to support the diagnosis (tick/add and submit together with form)
Impaired muscle power <i>(Spinal cord injury, Muscular dystrophy, Spina Bifida, Polio, Multiple sclerosis, others...)</i>	<input type="checkbox"/> Medical report * <input type="checkbox"/> ASIA scale * <input type="checkbox"/> Manual muscle test results <input type="checkbox"/> Electromyography <input type="checkbox"/> MRI / X-rays <input type="checkbox"/> Others
Impaired passive range of motion	<input type="checkbox"/> Medical report*

<i>(Joint contractures, trauma, arthrogyrosis, others...)</i>	<input type="checkbox"/> Goniometric measures of joint limitation * <input type="checkbox"/> X-rays <input type="checkbox"/> Photographs
Limb' s deficiency <i>(Traumatic amputation, dysmelia, trauma, bone cancer, others...)</i>	<input type="checkbox"/> Medical report * <input type="checkbox"/> Photograph of affected limb * <input type="checkbox"/> X-rays <input type="checkbox"/> Others
Hypertonia <i>(cerebral palsy, spinal cord injury, traumatic brain injury, stroke...)</i>	<input type="checkbox"/> Medical report * <input type="checkbox"/> Modified Ashworth Scale (MAS)* <input type="checkbox"/> Cerebral MRI or TC scan <input type="checkbox"/> Others
Motor Ataxia <i>(cerebral palsy, traumatic brain injury, stroke...)</i>	<input type="checkbox"/> Medical report * <input type="checkbox"/> Sara Scale * <input type="checkbox"/> Cerebral MRI or TC scan <input type="checkbox"/> Others

Attachments and instructions

The athlete' s health condition, as stated on this form, and the resulting impairment must fully explain any loss of function observed during the athlete evaluation. Otherwise, classification cannot be completed, and no sport class will be allocated, in accordance with World Archery classification rules.

Additional, recent, and relevant medical documentation must be attached if the athlete has:

- An impairment or diagnosis that cannot be clearly identified through observable signs or symptoms.
- A complex or rare health condition, or multiple impairments.
- A limb deficiency (amputation or dysmelia) at the level of the ankle, knee, wrist, or elbow joint (X-rays of the respective joints must be included).
- A spinal cord injury (recent ASIA scale results must be included).
- A neurologically related impairment such as ataxia or hypertonia (Modified Ashworth Scale scores must be included).
- Multiple sclerosis (EMG or MRI results must be included).

Additional reports from physicians, physiotherapists, or other health professionals may be submitted, where relevant, to complement the medical diagnostic information.

The World Archery UHC (underlying health condition) assessor and classification panel may request further information depending on the individual athlete's health condition and impairment.

Responsibilities

Athletes must submit a copy of this Medical Diagnostic Form and all relevant documentation to their member association.

Member associations must upload this form and all supporting documentation to the World Archery classification portal at least 60 days before the evaluation session.
